**WOSIL™ 120 GR**

**WOSIL ® 120 GR** as a precipitated silica is used as a reinforcing filler in all kind of rubber applications.

**CAS-No.** 112926-00-8 / 7631-86-9

### Applications

**WOSIL ® 120 GR** is a mechanically compacted granulate. On account of the granulation process it leads to less dust development during mixing. **WOSIL ® 120 GR** has a high reinforcing potential and imparts to rubber compounds high Shore hardness, tensile strength, tear resistance and abrasion resistance. In order to achieve optimum rubber-technical data the addition of activators like glycols, amines or other alcaline accelerators is necessary. On account of the higher surface area **WOSIL ® 120 GR** can provide vulcanizates of excellent transparency.

Application fields are: Tires, mechanical rubber goods, cables and shoe soles of all kinds.

### Packaging, Storage & Handling

Our silica products are inert and extremely stable chemically. We recommend storing the products in sealed containers in a dry, cool place, and removed from volatile organic substances. Recommended use-by-date is 24 months after date of manufacture. Product more than 24 months old should be tested for moisture content before use in order to make certain that it is still suitable for the intended application.
Application and Dosage

Information concerning the safety of this product is listed in the corresponding Safety Data Sheet, which will be sent with the first delivery or upon updating.
