

Wealth Ocean Inc.

was established in 2009 and draws upon 25 years of experience working in the rubber raw materials industry. We offer reliable and superior products and services to customers in a wide range of sectors, and focus on raw materials production and promotion. We strive to serve product developments and chemical research. Our main product lines are Chloroprene rubber, Synthetic resins, rubber auxiliaries such as carbon black, accelerators, plasticizers, antioxidants and other rubber materials. We serve a wide range of applications including solvent-based adhesives, sealants, UV curing materials, and industrial products such as rubber sheets, hoses, gaskets, conveyor belts, and other related areas.

Wealth Ocean is strategically located close to customers, and can fully serve our clients' needs worldwide. Our substantial, global reach allows us to bring only the finest raw material products to you, and help your bottom line without sacrificing supply chain integrity. We continuously add new industrial chemical products and materials for our customers to choose from.

Our company culture is dedicated to constantly expand our capabilities while investing in our people. Our core value is to strive for our customers' success, and our team prides itself in helping our customers and community.

We distribute rubber and rubber auxiliaries products including the following:

Rubber and Plastics:

Chloroprene rubber, Chlorinated rubber, Silicone rubber, Chlorinated PVC, SBS, E-SBS, and others

Synthetic resin and Hydrocarbon resin:

Phenolic resin, Tackifying resin, Reinforcing resin, Curing resin, C5 Hydrocarbon resin, and others

Rubber auxiliaries:

N-Phenyl-Benzenamine Reaction Products, Antioxidant AW, Antioxidant DNP, Antioxidant ODA, Antioxidant RD, Antioxidant 6PPD/4020, Antioxidant T531, Antioxidant IPPD, Antioxidant 4020, NS-6 (Antioxidant 2246), CD (antioxidant KY 405), Vulcanizator PM, and others

Pre-Dispersing Masterbatch:

Accelerator, Antioxidant, Antiscorching Agent, Vulcanizator, Coupling Agent, Cross-Linking Agent, Composite Additives, and others
